

BCA SEM III

Subject: Statistical Method and Data Analysis using R

Assignment 1

1. Find the Mode for the Following Frequency Distribution:

Class	0-10	10-20	20-30	30-40	40-50	50-60	60-70	70-80
Frequency	1	6	9	21	35	18	5	5

2. Calculate the Range, Coefficient of Range, Quartile and Quartile Deviation for the following Frequency Distribution:

Class	2-5	6-9	10-13	14-17	18-21	22-25	26-29
Frequency	8	13	35	58	40	38	20

3. The average marks of 400 students is 52 and the S.D. of the marks is 8. Then find

- (i) The passing marks is 40 marks number of students passed**
- (ii) The students get marks between 48 and 60**
- (iii) The students getting 66 marks in the examination**
- (iv) The number of students failed in the examination**

4. Explain Population and Sampling?

Assignment 2

- 1. Importing data into R from deficient file formats (CSV, and Excel)**
- 2. Adding, removing, and renaming variables/Attribute in R**
- 3. Identifying and handling missing values.**
- 4. Reordering and reshaping data frames.**

Note: Write both the Assignment in different assignment books. The Submission of the Assignment will be in the Next Week. Date will be informed to you in the next week.
